

1.14 tree command

tree command prints the directory structure in a nice visual tree design way.

```
[Nubeera@laptop ~]$ tree .
```

```
Code
```

```
Desktop
```

```
Dir1
```

```
    dir2
```

```
Documents
```

```
Downloads
```

```
Music
```

```
Pictures
```

```
    terminal1.png
```

```
Public
```

```
Templates
```

```
Videos
```
